

INFORMATION FOR PARENTS AND CARERS

Autism and Sensory Processing:

Understanding and addressing challenges

Sensory processing differences are common in autism and can cause challenges for participating in everyday activities. This session explores the nature and impact of these differences and strategies for managing challenges.

Please note: This information session is strictly for parents and family of people on the autism spectrum. If you are interested in training for professional development purposes, please contact our Training Manager.

TIME:

9:30AM – 11:30AM on Monday, June 18th
